*The Journal of Research and Practice for Adult Literacy, Secondary, and Basic Education is published three times per year. You can subscribe anytime during the year. Subscriptions will begin with the first issue after your form has been processed. You can subscribe to the journal online by visiting joincoabe.org and clicking on Journal or by scanning this QR Code with any bar code reader.*
A group of adult education science teachers and I have been reviewing science instruction videos for adult learners in a LINCS Science Community of Practice Micro-group. We have found several science video websites and many specific instructional videos that, although not specifically made for adult learners, are engaging and suitable for adults who need to learn science, for example, in preparing for a high school equivalency test. Equally important, we have learned about how to use science videos.

Just watching videos, regardless of their quality and engagement, does not necessarily increase knowledge. Even when students say they have learned a lot from watching a video, some research shows they have not. They watch passively, looking for confirmation of what they think they already know. A better way to make use of videos is to begin by asking students what they know, and then recording that on a flipchart or chalkboard, or, for the technology-inclined, using Coggle on an Electronic whiteboard. Then, after showing the video, return to the flipchart, chalkboard or electronic whiteboard, and ask students what they would like to change, what they have learned or are not as sure about.

Here are some recommended science video collections, and for some of these, some recommended science categories or specific videos:

**Annenberg Science Videos**
http://www.learner.org/resources/browse.html?d=6
- **The Brain: Teaching Modules**
  http://www.learner.org/resources/series142.html
- **Earth Revealed**
  http://www.learner.org/resources/series78.html
- **The Mechanical Universe...and Beyond (Physics)**
  http://www.learner.org/resources/series42.html
- **Planet Earth**
  http://www.learner.org/resources/series49.html
- **The World of Chemistry**

Science Video categories
• Dinosaurs and other prehistoric animals
• Fish and other aquatic animals
• Insects
• Frogs and other amphibians
• Reptiles
• Birds
• Mammals
• Human evolution
• Earthquakes and volcanoes
• Outer space
• Systems of the human body

A collection of free, professional quality online “video magazine” articles on science for adult basic skills learners with the theme of cooking.
Untamed Science  http://www.untamedscience.com/ Biodiversity and biology topics

Veritasium
http://www.youtube.com/user/1veritasium
http://www.pinterest.com/carlosportela/veritasium/
Nearly 175 videos, apparently uncategorized. Described in Wikipedia as follows: “Veritasium is an educational science channel on YouTube created by Derek Muller. The videos range in style from interviews with experts such as Physics Nobel Laureate, 2011, Brian Schmidt,[1] to science experiments, dramatizations, songs, and interviews with the public to uncover misconceptions about science, a hallmark of the channel.”

Science videos in these categories: Astronomy and Space, Earth Science, Chemistry, Environmental science, Life sciences, Physics, Scientific inquiry, Scientists and inventions, Underwater volcanoes, Science-Current events science documentaries

Adult English language learning videos, some of which have health-related themes.

David J. Rosen is an education consultant in the areas of adult education, distance education, and technology.

1LINCS is the U.S. Department of Education/OCTAE-sponsored Literacy Information and Communications System. Among its services are free public adult education discussion forums in sixteen topic areas. For more information, see http://www.lincs.ed.gov  Also, a complete list of the science videos is available at http://tinyurl.com/pe5hb4a

2For more information about Coggle, a free mind-mapping app, see my Tech Tips for Teachers blog article at http://techtipsforteachers.weebly.com/blog/watch-a-video-and-make-a-mind-map-with-coggle
